

I am outraged at the suggestion that the Wisconsin No-Call List should be superseded by the Federal List. Before the Wisconsin No-Call List was activated my family could almost never eat supper uninterrupted by a call from someone trying to sell us something. Callers were usually very aggressive and it was not possible to end the call without hanging up on the caller. I resent having my home invaded by commercial interests which have not been requested to call me. Please do not permit this to happen.
